PRODUCT CATALOG

An i3 environment is dependent upon all areas of a learning space – the **1 Student**, **2 Instructor**, **3 Wall** and **4 Distributed** zones. When the needs of these zones are met, the result is an interactive, integrated and inspiring place to learn and work. We call this an i³ environment.

1

STUDENT ZONE

Today's classroom must be comfortable and flexible. They need to easily transform from individual to team configurations. That is why our wide range of products are adjustable, mobile, integrate technology and are available with multiple work surface shapes and sizes.

2

INSTRUCTOR ZONE

Instructors provide our children with the skills that will help them succeed in their future endeavors. Equipping them with tools that are mobile and integrate technology enables instructors to focus on student needs.

3

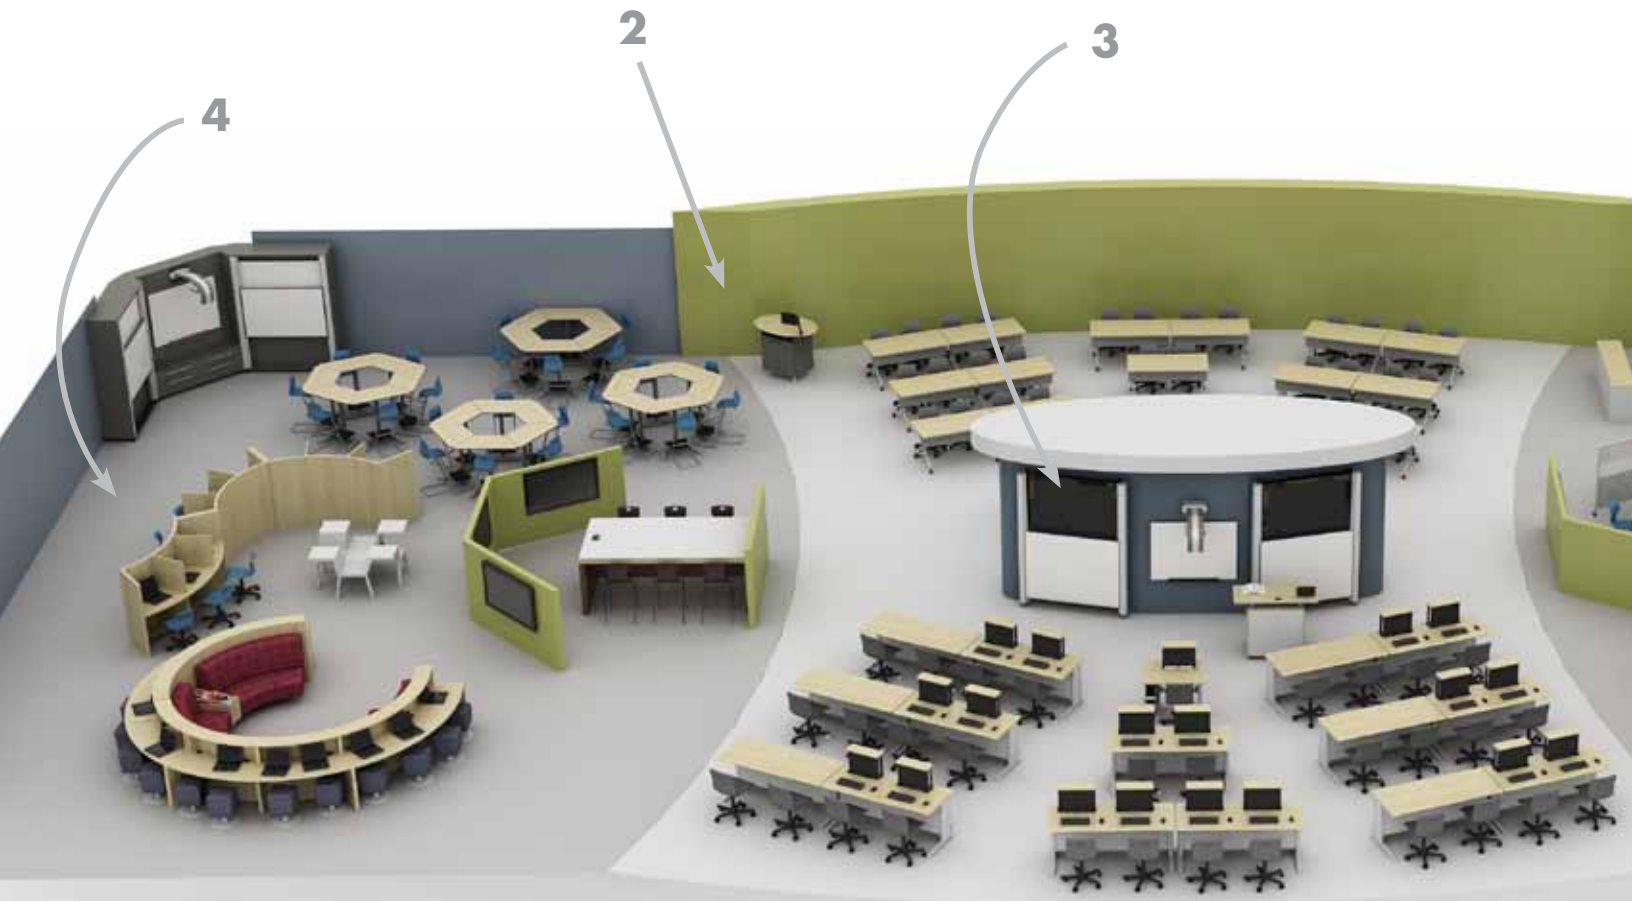

WALL ZONE

Walls are portals to the world of knowledge. Walls must facilitate the exchange of knowledge between students and teachers, student to student and teachers to students.

4

DISTRIBUTED ZONE

Because learning no longer just takes place in the classroom, other environments must also be carefully considered. These environments are enabled so that instructors, students and content can be located in different, non centralized locations.

Opti+ is an innovative seating and desking platform that supports

Opti+.move

Opti+.move elevates the student to promote balanced seating and enhanced learning. The taller frame breaks the psychological boundaries between student and instructor by bringing them to the same eye level. Its sleek European design creates a modern aesthetic for inspiring environments. Opti+.move is available in two heights: Sit/Stand, 41", and Sit, 35.5".

Opti+.be

The streamlined look of Opti+.be coordinates with standard height Opti+ chairs. Available in 5 fixed heights and one adjustable height. Opti+.be supports students of all ages, from kindergartners to adults. Integrate Opti+.be into a room of Opti+.move for an innovative stadium seating environment.

ERGONOMICS BALANCED SEATING

Opti+ provides a seat that tilts forward and encourages natural resting posture. Additionally, Opti+.move sits higher and opens the angles of the hip, allowing the thighs to slope downward in "Balanced Seating" posture.

While traditional ergonomics theory is relevant and valid, maintaining this posture is difficult for more than 2 minutes.

Balanced Seating is easier to maintain and allows the spine to carry the body weight in a more comfortable way.

balanced seating, movement and interaction for the most inspiring learning environments.

ADJUSTABLE FOOTREST

The adjustable footrest makes Opti+.move appropriate for primary school children and higher education students. The concept of adjusting the height of the floor gives the user the sustainable comfort of **“Balanced Seating.”**

ERGONOMICS MOVEMENT

**Movement is
natural—
sitting perfectly
still is not.**

WHY DOES MOVEMENT MATTER?

Movement is natural—sitting perfectly still is not, especially for students. Classroom seating needs to support natural shifts in position, allowing students to be comfortable and maintain focus.

The entire Opti+ seating line is designed to respond to body movement. The shell offers a unique blend of support and flexibility. Five flex points built into the shell respond to the body's natural shifts and eliminate pinch points that are often created by hard chairs.

Opti+.move takes the concept of encouraging movement even further with the Sit/Stand model. Use Sit/Stand as a comfortable seat or stretch your legs and stand as you rest your bum on the perch.

5 AREAS THAT **SUPPORT MOVEMENT**
WITHIN OPTI+ CHAIRS

1

DYNAMIC BACK
flexes with ease

2

ACTIVE CORNERS
promote dynamic movement

3

LUMBAR SUPPORT
facilitates proper spine alignment

4

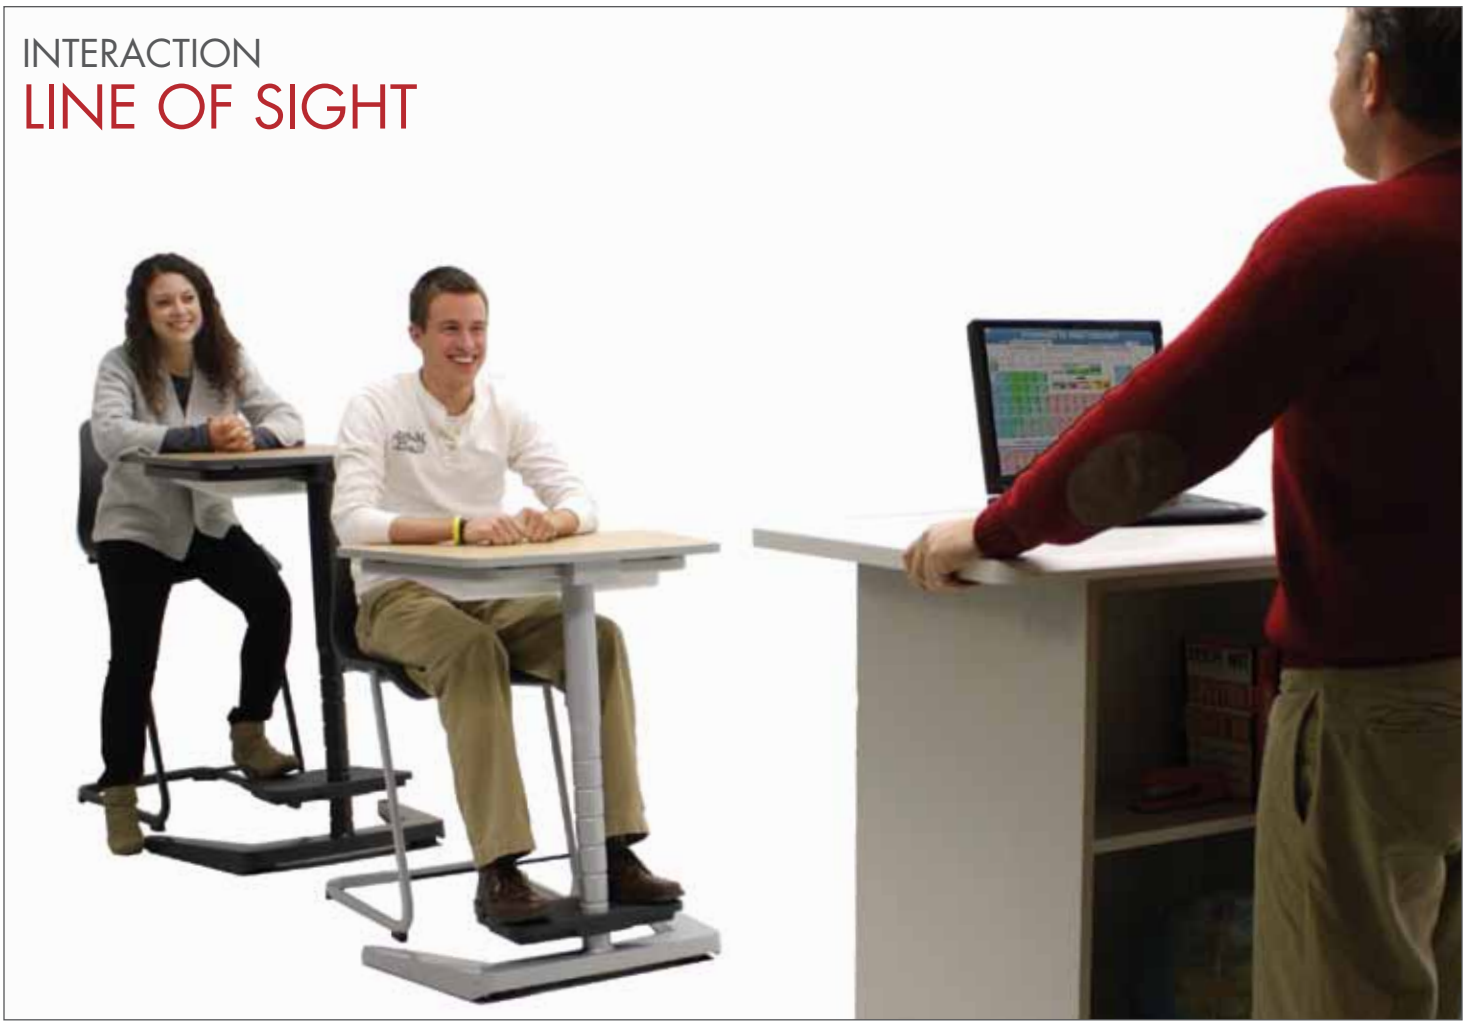

WATERFALL EDGE
prevents circulation pinch points

5

AIR CUSHION SHELL
conforms as you move

INTERACTION LINE OF SIGHT

See clearly with Opti+
The Opti+ higher line of sight allows clear visibility over other desks, so students can participate more effectively.

Flexible in design to accommodate group work
Opti+ seating is easy to move and the design of the desk welcomes users on both sides for quick huddles and group work.

Students and teachers learn together
Sitting higher in Opti+.move allows students and teachers to see eye to eye, promoting performance and a positive atmosphere.

1

Integrated casters allow Opti+ to move easily, supporting movement within the classroom.

Switching to various configurations easily, Opti+ gives instructors room for creativity and the ability to reach students through their individualized learning styles.

2

A perfect fit for any environment, the Opti+ boasts a sleek new European design. With the ability to pair a variety of work surface shapes and sizes Opti+ is a tool that inspires lifelong learning and promotes a healthy environment.

Opti+ Chair | Technical Specs

- 1** Ergonomically designed blow molded air cushion shell.
- 2** Recyclable polypropylene.
- 3** Fully welded (MIG) 2mm/14 gauge steel, 16mm x 31mm flat oval bend tube construction.
- 4** Opti+ Move has an integrated footrest.
- 5** Anti-tip saddle foot glides riveted to frame have replaceable felt and nylon inserts.

Anti-tip glides keep users firmly on the ground

Glides with interchangeable inserts are available. Choose nylon or felt and snap in place.

Integrated groove pattern keeps users cool and comfortable

Stack up to 7 high

Move easily with the built-in handle

Designed to rest on work surfaces without marring or scratching

Ecological Design

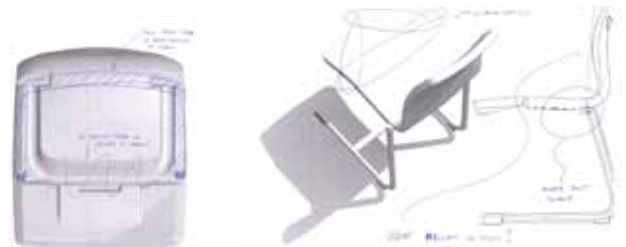

Designed from the life cycle perspective, Opti+ uses the simplest materials. The shell is constructed of recyclable polypropylene and the frame is steel. The durable and secure screw-less attachment minimizes materials and can also be recycled.

About the Designer

Johan Heyvaerts, lead designer for the Vanerum Group, continues to work hard at providing innovative, well designed products for learning spaces. His vision of ensuring that his designs continue to speak to the i3 philosophy of the organization, manifests itself in the creation of Opti+. His objective was to create a dynamic, interactive product that supports shape and movement, and that creates a “balanced seating” position for all users. Not only must the design make efficient use of space, it must be flexible enough to change with the individual user needs and the general facility needs as requirements evolve.

The result, a well designed, ergonomic solution that meets the progressive needs of the user, meets the current and future needs of facilities, with no compromise to comfort and durability.

WARRANTY Vanerum•Stelter extends to the original purchaser from the date of purchase a 15-year limited warranty against manufacturing defects in material and workmanship for Vanerum•Stelter products purchased from and installed exclusively by Vanerum•Stelter or a factory authorized installation company. Visit www.vanerumstelter.com for more details.

learning is lifelong

Vanerum•Stelter is dedicated to providing each customer with outstanding products and services for their interior environments. We bring knowledge, creativity, innovation and passion to each and every encounter. Our mission is to enhance how people learn and work by making an efficient and effective connection between people, furniture and technology. This approach lives in our philosophy of i3 environments – creating environments that are interactive, integrated and inspire results in higher productivity and enhances lifelong learning.

We are forever in the pursuit of new design, new knowledge and new relationships. We are focused on providing solutions through a dedicated distribution network – the top 100 office furniture dealers in North America and the top 100 architectural and design practices/firms in North America. We also have an outstanding set of manufacturing partners. Our business partner, Vanerum Group, is one of Europe's leading suppliers of total learning environments. With 40 years of experience, Vanerum is changing the way people teach, learn and work throughout the world. These individuals, along with our dedicated team, will work tirelessly to provide quality products and an unparalleled level of service each and every day.
